

Student Name: _____

Class: _____

Due Date: _____

Introduction

Welcome to our exciting journey of exploration and discovery! In this workbook, we will delve into the wonders of our world, integrating simple measurements, numeracy, reading, and writing with arts and crafts, dramatic zone, and construction zone activities. This workbook is specifically designed for 6-year-old kindergarten students, with the aim of preparing them for the adventures of primary school.

Measurement Fun

Measure the length of a pencil using a ruler. Write the measurement in centimeters.

Compare the weights of two objects using a balance scale. Which object is heavier?

Measure the distance between two points in the classroom using a measuring tape. Write the measurement in meters.

Count the number of blocks in the picture. Write the correct number.

Solve the math problem: $2 + 2 = ?$

Create a pattern using shapes and colors.

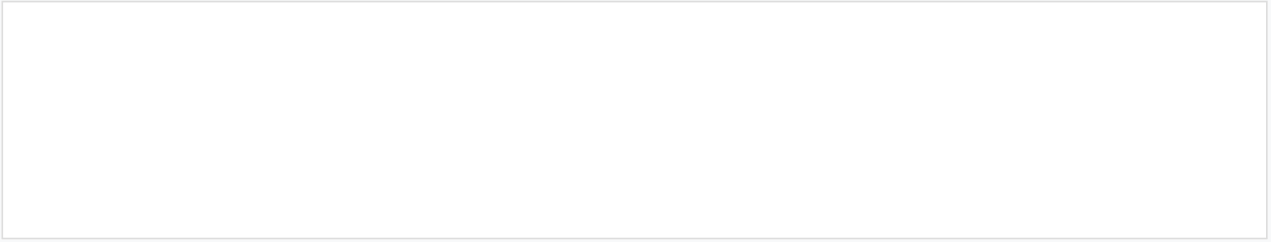

Read the story and answer the questions:

- What is the main character's name?
- What is the setting of the story?

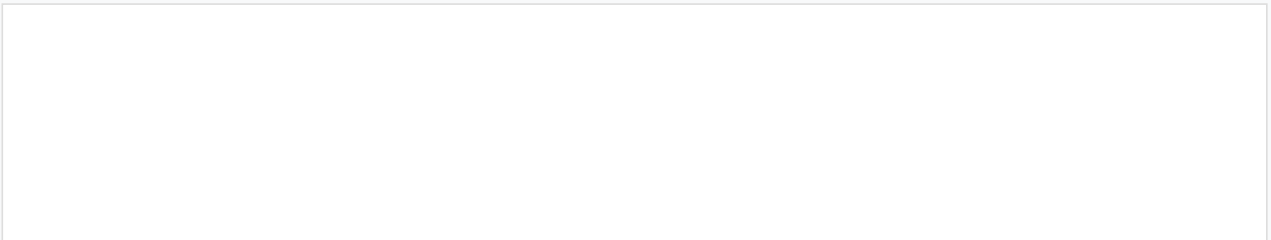

Write a short story about your favorite animal.

Draw a picture and write a caption about your favorite food.

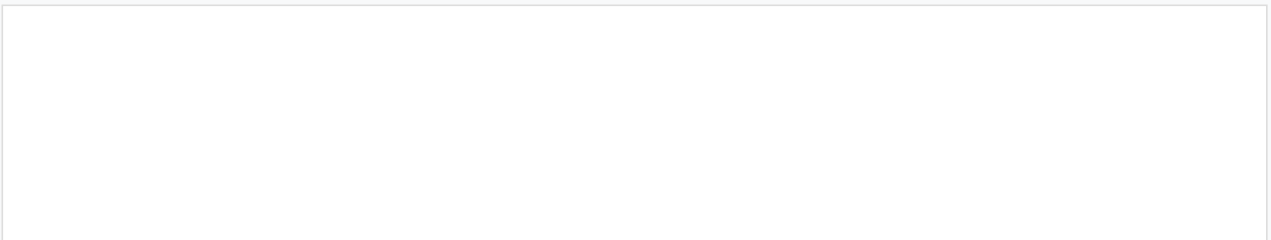

Create a collage using recycled materials.

Draw a picture of your favorite place in the world.

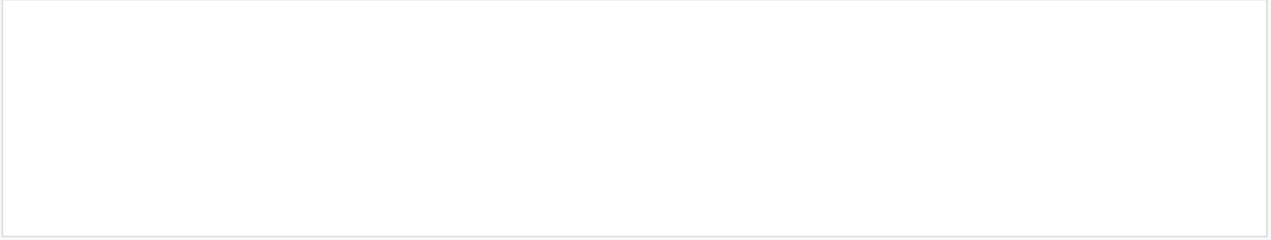

Make a paper plate craft to represent a famous landmark.

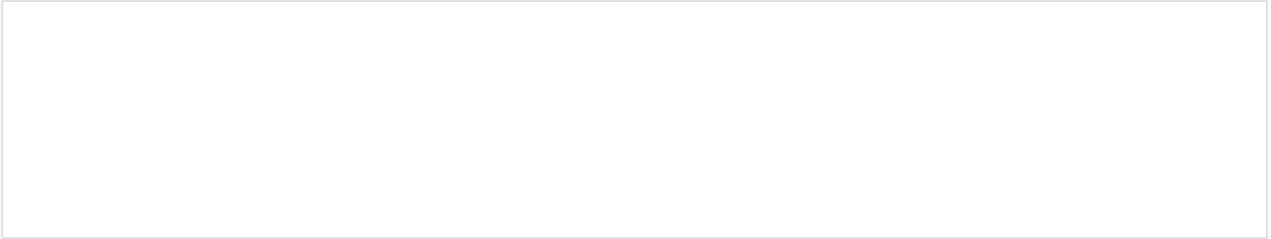

Dramatic Zone

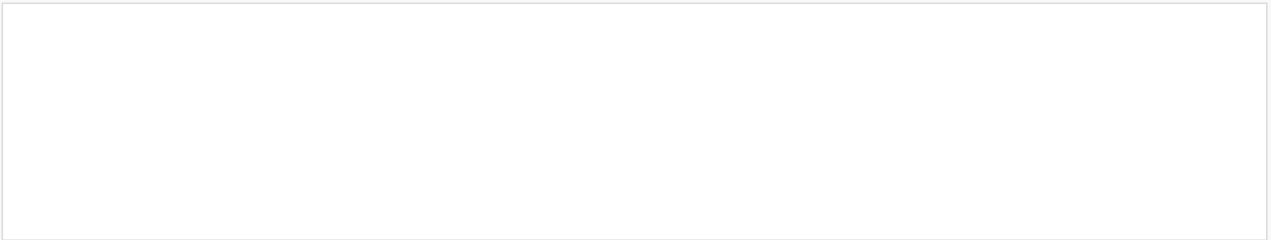

Act out a scenario related to travel, culture, or community.

A large, empty rectangular box with a thin grey border, intended for a student to write or draw a scenario related to travel, culture, or community.

Create a puppet show using hand puppets or finger puppets.

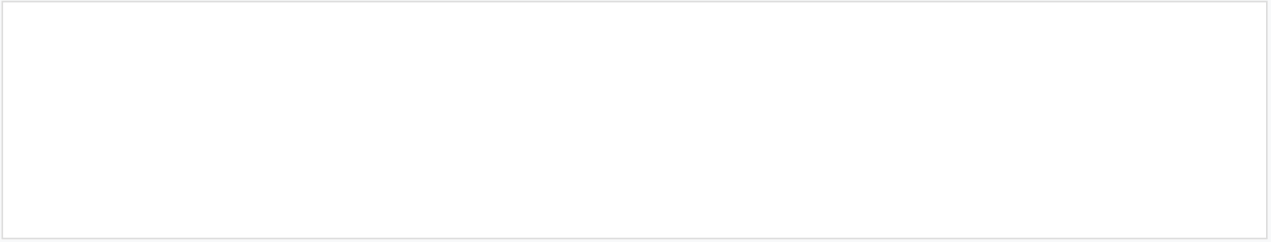

A large, empty rectangular box with a thin grey border, intended for a student to write or draw details for a puppet show using hand or finger puppets.

Role-play a scenario where you have to solve a problem.

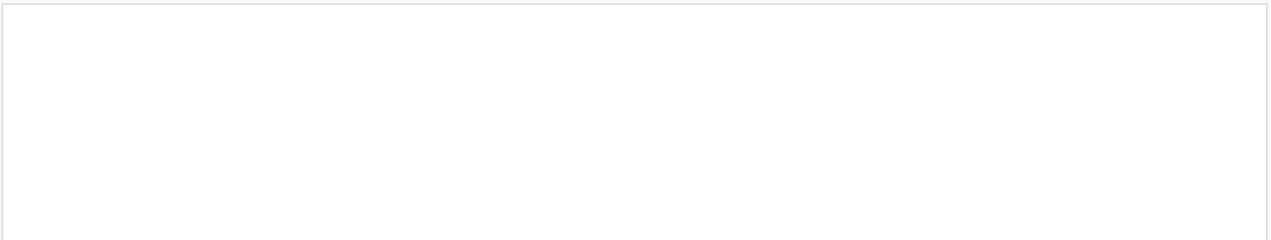

A large, empty rectangular box with a thin grey border, intended for a student to write or draw a scenario where they solve a problem through role-play.

Construction Zone

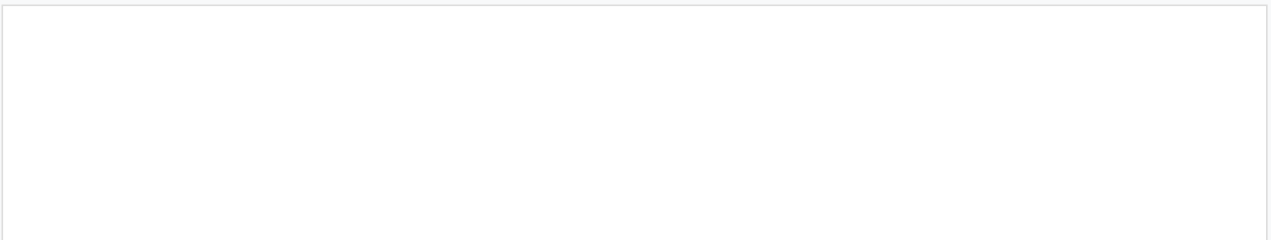

Build a bridge using blocks or LEGO.

Create a model of a famous landmark using clay or playdough.

Design and build a simple machine using everyday materials.

Conclusion

Congratulations on completing this workbook! We hope you had fun exploring our world and developing your skills in measurements, numeracy, reading, and writing. Remember to always keep learning and exploring, and don't forget to have fun!

Assessment

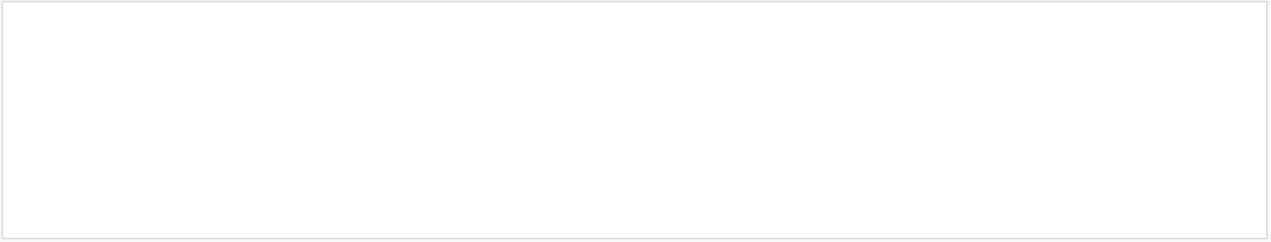

Measurement quiz: Measure the length of a pencil using a ruler. Write the measurement in centimeters.

Numeracy quiz: Solve the math problem: $5 - 2 = ?$

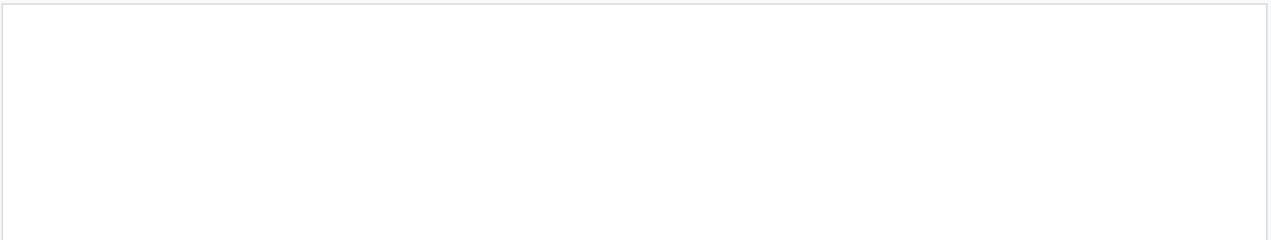

Reading comprehension: Read the story and answer the questions.

Extension Activities

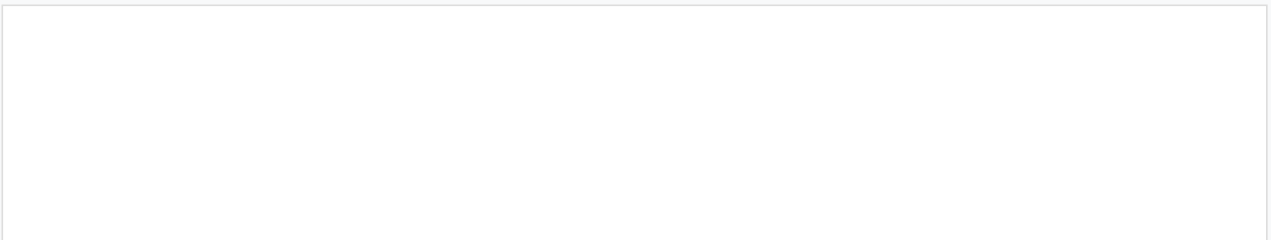

Create a measurement scavenger hunt around the classroom or school.

Design and build a simple machine using everyday materials.

Write a short story about a character who travels to a new country.

Glossary

Measurement: The process of finding the size, length, or amount of something.

Numeracy: The ability to understand and work with numbers.

Reading: The process of understanding and interpreting written text.

Writing: The process of creating written text.
