

Student Name: _____

Class: _____

Student ID: _____

Date: {{DATE}}

Assessment Details

Duration: 30 minutes

Total Marks: 100

Topics Covered:

- Addition
- Multi-digit numbers
- Real-world scenarios

Instructions to Students:

1. Read all questions carefully before attempting.
2. Show all working out - marks are awarded for method.
3. Calculator use is permitted except where stated otherwise.
4. Write your answers in the spaces provided.
5. If you need more space, use the additional pages at the end.
6. Time management is crucial - allocate approximately 1 minute per mark.

Question 1

[2 marks]

What is the result of $2 + 2$?

A) 3

B) 4

C) 5

D) 6

Question 2

[2 marks]

If you have 5 pencils in your pencil case and your friend gives you 2 more, how many pencils do you have now?

Question 3

[5 marks]

Create a simple addition problem using real-world objects (e.g., blocks, counting bears) and solve it.

Question 4

[8 marks]

What is the result of $14 + 25$?

A) 39

B) 40

C) 41

D) 42

Question 5

[8 marks]

A bookshelf has 5 shelves, and each shelf can hold 3 books. If the bookshelf is currently empty, how many books can be placed on it in total?

Question 6

[10 marks]

Create a word problem involving addition (e.g., "Tom has 15 pencils and his sister gives him 7 more...") and solve it.

Question 7

[15 marks]

What is the result of $45 + 27$?

A) 72

B) 71

C) 70

D) 69

Question 8

[10 marks]

A bakery sells 250 loaves of bread per day. If they receive a new shipment of 175 loaves, how many loaves do they have in total?

Question 9

[15 marks]

Create a real-world scenario involving multi-digit addition (e.g., "A company has 350 employees in one office and 275 employees in another...") and solve it.

Additional Space for Answers

Three large, empty rectangular boxes with dashed borders, stacked vertically, intended for students to write their answers to the assessment questions.

Glossary

Addition: The process of combining two or more numbers to find their total or sum.

Multi-digit numbers: Numbers with more than one digit, such as 14 or 25.

Real-world scenarios: Situations that occur in everyday life, such as buying groceries or counting money.

Assessment Rubric

Content Knowledge: Does the student demonstrate an understanding of the concept of addition and its application in real-world scenarios?

Problem-Solving: Can the student solve addition problems accurately and efficiently?

Communication: Can the student communicate their mathematical ideas and solutions clearly and effectively?
