### Short Answer Questions

---

*Check your answers with the following key:*

1. 1. The Amazon rainforest is the largest tropical rainforest in the world, covering over 5.5 million square kilometers. The geographical features of the Amazon rainforest include dense vegetation, vast river systems, and diverse wildlife. The local population, including indigenous communities and farmers, rely on the forest for their livelihood, including hunting, fishing, and agriculture. However, the forest is also facing threats such as deforestation, logging, and climate change, which affect the local population's way of life.
2. 2. The Industrial Revolution was a significant historical event that transformed European society from an agrarian to an industrial economy. The causes of the Industrial Revolution included the availability of natural resources, technological innovations, and the growth of trade and commerce. The effects of the Industrial Revolution included the growth of cities, the development of new industries, and the improvement of living standards. However, the Industrial Revolution also had negative consequences, such as the exploitation of workers, environmental degradation, and social inequality.
3. 3. Japan and Brazil are two countries with distinct cultural practices and traditions. Japan is known for its traditional dress, such as the kimono, and its traditional tea ceremony. Brazil, on the other hand, is known for its vibrant music and dance, such as samba and bossa nova. Both countries have a strong emphasis on family and community, but Japan is known for its collectivist culture, while Brazil is known for its individualist culture.
4. 4. International cooperation is essential in addressing the global issue of climate change. Climate change is a global problem that requires a global response, and international cooperation can help to reduce carbon emissions, promote sustainable development, and protect the environment. International organizations, such as the United Nations, play a crucial role in promoting international cooperation and coordinating global efforts to address climate change.
